

## Good Nature Organic Lawn Care now Greener with Third Sun Solar

Good Nature Organic Lawn Care decided to install solar PV at its Cleveland facility. “Reducing the environmental impact of its operations aligns with the Good Nature mission to make the world a little better place one organic client at a time”, states Good Nature Founder, Alec McClennan. ***Good Nature helps their clients enjoy beautiful lawns and landscapes without potentially harmful pesticides.***

The rising cost of electricity from traditional sources, paired with the declining cost of solar panels and systems over the last several years, makes solar a no-brainer for many homeowners and businesses.

The solar system will reduce Good Nature’s electricity costs by an estimated 35%. Generous federal incentives combine with modern solar’s low costs make it a competitive alternative compared to the utility’s brown electricity. The Good Nature solar installation is scheduled for April 2018... *more to come on this installation.*

**Good Nature Organic Lawn Care** provides a healthy lawn and the peace of mind that comes from knowing it’s maintained naturally and is ***kid-friendly and pet-friendly.*** ***Learn more at [www.whyygoodnature.com](http://www.whyygoodnature.com).***
